

# MOLD

## INVESTIGATION/REMEDICATION

In the light of today's industry, mold has become a serious problem for everyone. Some industries affected are real estate and property management companies, homeowners and Insurance companies to name a few.

When dealing with Mold, look to the experts. County Environmental Company has the experience and expertise to contain, remove and return any affected area to better than pre-loss condition.

Whether it is your home or business, your health, and safety of the building is of the utmost importance. We inspect, analyze, assess, extract and make the environment a cleaner, , healthier place to live with our highly trained and certified microbial remediation processes.

Once the source of the problem is located, we will contain it and carefully remove the mold and repair all affected areas. Any salvageable items that have been contaminated will be removed, cleaned and treated to pre-loss condition or better. The job is not complete until the building has passed a clearance testing.

County Environmental Company provides experts for mold inspections, consultations and remediation. We can inspect, assess, estimate and recommend solutions to any mold problems- from start to finish. Mold remediation can be a simple process if done by the right people, We are the experts you want to call.
